

Table of Contents

Foreword	1
Abbreviations	2
1. Introduction	5
2. Forest Seed and Gene Conservation	6
2.1 Gene-Ecological Zonation	6
2.2 Biological Rationale Behind the Conceptualization of Gene-Ecozones	7
2.3 The Gene-Ecological Zonation Map and its Use in Gene Conservation	10
2.3.1 Gene Conservation Planning	11
2.3.2 Seed Zoning	11
3. Theoretical Considerations	12
3.1 Climatic Influences on Plants	12
3.2 Topography	14
3.3 Geology and Soil	15
4. Description of Ecological Factors in Cambodia	18
4.1 Criteria used in the Formulation of Gene-Ecological Zone	18
4.2 Geography and Physiography of Cambodia	19
4.3 Simplification of Database and Generation of Mapping Systems	22
4.3.1 Annual Rainfall	22
4.3.2 Length of Dry Season	23
4.3.3 Temperature	24
4.3.4 Geology	26
4.3.5 Soils	27
4.3.6 Forest and Land Use Classification	30
4.3.7 Delineation of Gene-Ecological Zones	32
5. Results of the Gene-Ecological Zoning System in Cambodia	33
5.1 Biological and Geographical Character of Gene-Ecozones	33
5.1.1 Coastal Cardamoms (A)	33
5.1.2 Northern Cardamoms (B)	34
5.1.3 Tonle Sap Floodplain (C)	34
5.1.4 Redlands (c)	35
5.1.5 Northwestern Lowlands (D)	36
5.1.6 Central Lowlands (d)	36
5.1.7 Lower Mekong Floodplain (E)	37
5.1.8 Eastern Mekong Basin (F)	38
5.1.9 Central Annamites (G)	38
5.1.10 Southern Annamites (g)	39
6. Use of Gene-Ecological Zonation Model	41
6.1 Selecting an area by using the Query tool ()	43
7. Literature Cited	48

MAPS, FIGURES, AND TABLES

Figure 1. Influence of Water and Temperature Regimes on Vegetation	12
Figure 2. The Water Cycle	15
Figure 3. Determinant Factors of Gene-Ecological Zones	19
Figure 4. Monthly Rainfall Variation and Average in Two Locations	23
Figure 5. Monthly Mean Temperature	25
Figure 6. Old Alluvial Terraces and Colluvial Floodplains	28
Table 1. Ecological Versatility of Some Cambodian Timber Trees	9
Table 2. Factors Affecting Plant Growth	14
Table 3. Soil Groupings of the FAO-UNESCO Systems	17
Table 4. Cambodian Soils by Formation	29
Table 5. Distribution of Priority Species in Gene Ecozones	40
Map 1. Gene-Ecological Zones of Cambodia	10
Map 2. Distribution of Meteorological Stations in Relation to Elevation	20
Map 3. Major Physiographic Zones of Cambodia	21
Map 4. Distribution of Rainfall Regimes in Cambodia	22
Map 5. Length of Dry Seasons in Cambodia	24
Map 6. Distribution of Low-temperature Regions of Cambodia	25
Map 7. Detailed Distribution of Geological Formations	26
Map 8. Generalized View of the Geology of Cambodia	27
Map 9. Distribution of Soil Types in Cambodia	29
Map 10. Generalized Distribution of Soil-fertility Classes	30
Map 11. Detailed Map of Forest and Land Cover (1996-1997)	31
Map 12. Generalized Distribution of Vegetation in Cambodia	32
Map 13. Distribution of Gene-Ecological Zones	32

APPENDICES

Appendix i - Table of Criteria for Gene-Ecological Zones	51
Appendix ii - Climatic Data from 123 Meteorological Stations	52
Appendix iii - Temperature Data(Minimum, Maximum, and Average) from nine Meteorological Stations in Cambodia	54
Appendix iv - Conversion Soil and Forest/Land Use Maps into a Soil Fertility Zonation Map	55
Appendix v - Basis for Simplification of Vegetation Type	56
Appendix vi - Summarization of Environmental Factors that Delineate Gene-Ecological Zones	57
Appendix vii - Flow Diagrams of Gene-Ecological Model	58
Appendix viii - Flow Charts of Gene-Ecological Model	62
